There seems to be a lot of discussion about wearing a mask in the clubhouse. Do you wear a seatbelt when you are in a car? Of course. To protect yourself and others. Do you wear a mask in the clubhouse if you are not able to maintain 6 feet distance, of course! To protect yourself and others. Since we are all in this together, let's be mindful of everyone we come in contact with. Let's protect ourselves and others. Thanks KP

Now that we have discussed the importance of wearing a mask and social distancing, I received a call this morning that another of our neighbors has tested positive. We discussed the importance of 14 day quarantine and retesting after that time to be sure the test is negative. So, continue to wear masks and social distance and wash your hands. If you want to send a get well card, please send to me and I will make sure it gets in the right hands. As I have said before, we are all in this together. Prayers are always welcome. Thanks Krabby Patty

Well, it appears the tropical storm has missed us, for now, but we have positive #6. She has notified anyone she has been in contact with to let them know. Please continue to be careful, wear your mask, social distance, wash your hands. She is not sure where she got it, and is doing OK, just very tired. Stay healthy.

What to learn from this, do not go to places where masks are not worn and lots of people show up. 1 & 2 not sure where they got it. # 3 works at a store in Sebring where lots of folks shopping refused to wear masks.
